

Summer 2

2016

Reflective shapes. Creating a symmetrical pattern

- What does symmetrical mean?
- Can you give examples of what you think this is?
- You will have a piece of paper with squares then fold it in half.
- You will create half a picture on one side of this and then match the pattern on the other side to create a whole image.

Tie dye Butterflies.

- We are going to make a giant butterfly.
- We will need paper cut in to a butterfly shape.
- Some coloured dyes.
- What happens when we drip the ink on to the paper?
- What happens to
- the colours?
- Now using your knowledge of symmetry you will have your own butterfly shape. What can you do with it?

Reflective Symmetry

- How can you make a reflective pattern with shapes?
- You will need two pieces of coloured paper, scissors and glue.
- Think about the shapes you will use.
