

Summer 3

2016

Floating flowers

- Can you make a flower from paper?
- Decide what type of paper you will need.
- Fold the petals down flat on top of each other.
- Now you must float your flower on the water.
- What happens to the paper when it gets wet and why?
- **Floating flowers** --- Science --- UW – W - Skill – To discover what happens to the paper when wet. (As the fibres swell in the paper. The paper expands making the flower open.) 40 – 60 months

Woolley Dandelion's

- Looking at the natural flowers around us. Look closely at the petals. Some flowers have many petals were as others have single petals.
- Now with wool and pipe cleaners you will create your own flowers.
- You will need to use your fine motor skills to wind on weave the wool.

Magic symmetrical flowers

- How can you make a magic symmetrical picture?
- Cover a piece of paper with coloured wax crayons on one side.
- Now colour over the coloured wax with black wax crayon.
- Now how can you create a symmetrical picture?
- What tools will you need?
